1 Introduction

1.1 Genesis of the EAC Standardization Plan

The development of a Regional Standardization Plan (RSP) is a response to the implementation of the EAC-SQMT Strategic Plan 2018-2023, which necessitated development of the RSP with the objective of prioritizing the standardization projects to optimize scarce resources, while facilitating regional and international trade. It was against this backdrop that the 22nd meeting of the East African Standards Committee (EASC) directed the Standards Management Committee (SMC) to develop the Standardization Plan.

The development of this RSP was intended to trigger the harmonization of standards based on EAC economy. During the process, attention was made to intra EAC trade, trade between the EAC and the rest of Africa and EAC and the rest of the world. In addition, consideration was given to contribution of priority sectors to GDP, social economic factors and EAC policy priorities among others.

Implementation of this RSP will increase the number of standards, which will facilitate trade by reducing technical barriers to trade, resulting into an increase in trade volumes through quality products and sustaining regional economic development.

1.2 Development of EAC RSP

The EAC Regional Standardization Plan (RSP) provides a framework for deciding how to use limited regional standardization resources through prioritization and planning in short and medium-term perspectives.

Upon completion of the RSP and adoption of the East African Standards, the following benefits will be realized:

- positive regional social-economic impact on the people of East Africa in terms of enabling trade and economic development; and
- enhanced support by industry, business and the public as a result of improved stakeholder engagement in coming up with the plan. This will subsequently lead to greater uptake of published standards.

In addition, this plan provides a framework for supporting the EAC SQMT Strategic Plan 2018-2023, and the provision of the EAC SQMT Act through standardization.

This plan was prepared by the Standards Management Committee (SMC) through a Steering Committee following extensive engagement process with stakeholders in the region and it was approved by East African Standards Committee (EASC) on 12th June 2020 for implementation for a three-year period 2020 – 2023. To keep abreast with technological changes, global dynamics and overriding factors, this three year-plan

will be reviewed annually.

During the development of this document, the following stakeholders were consulted:

- i) Technical Committees (TCs);
- ii) The private sector (industry and business);
- iii) MSMEs and related associations;
- iv) Consumers and consumer organizations;
- v) Government agencies;
- vi) Export promotion agencies;
- vii) Learning and research institutions;
- viii) Non-Governmental Organizations (NGOs);
- ix) Business Support Organizations (BSO); and
- x) Financial institutions.

During the preparation of this plan reference and benchmarking was made to the following publications and information sources:

- i) ISO draft Manual on Developing National Standardization Strategies, February 2017;
- ii) EAC Vision 2050;
- iii) 5th EAC Development Strategy 2016-2021;
- iv) Kenya National Bureau of Statistics (KNBS) Economic survey 2018;
- v) Rwanda National Institute of Statistics (NISR) Economic survey 2018;
- vi) Tanzania National Bureau of Statistics (NBS) Economic survey 2018;
- vii) Burundi Bureau of Statistics (ISTEEBU)
- viii) Uganda Bureau of Statistics (UBOS);
- ix) EAC SQMT Strategic Plan 2018-2023;
- x) EAC Industrialization Strategy 2012-2032;
- xi) East African Community Facts and Figures (2016) Report; and
- xii) International Trade Centre data (ITC) 2018.

2 Summary on Regional priorities and expected benefits

2.1 Economic priorities (economic impact)

2.1.1 Gross Domestic Product (GDP) contribution

The development of the Regional Standardization Plan (RSP) was based on the assessment of EAC economic priorities, intra EAC trade and the rest of the world; and the contribution of various sectors to GDP. Ranking was done based on the importance of the sectors to the economies.

The following ranking criterion based on ISO Manual for developing National Standardization Strategies was used in coming up with Table 1 below:

- Rank 1 >10 % of GDP;
- Rank 2 5 % - 10 % of GDP;
- Rank 3 1 % - 5 % of GDP;
- Rank 4 0.2 % - 1 % of GDP; and
- Rank 5 <0.2 % of GDP.

NOTE South Sudan did not submit data and therefore was not considered in coming up with the average.									
* The overall ranking for the sector is a sum of sub sectors; agriculture, forestry and fishing. (this note is not clear, I think the overall rank in the last column is the simple average of ranking from partner states)									

2.1.2 Export earnings

The development of the Regional Standardization Plan (RSP) was based on the assessment of their contribution to EAC export earnings. Ranking was done based on the importance of the sectors to the economies. The following ranking criterion based on ISO Manual for developing National Standardization Strategies was used in coming up with Table 2:

- Rank 1 >10 % of EAC export earnings;
- Rank 2 5 % - 10 % of EAC export earnings;
- Rank 3 1 % - 5 % of EAC export earnings;
- Rank 4 0.2 % - 1 % of EAC export earnings; and
- Rank 5 <0.2 % of EAC export earnings.

Table 2 represents key economic sectors based on their contribution to EAC export earnings.

2.2 Non-economic priorities (Social Impact Strategy)

In addition to supporting economic growth, standardization supports non-economic dimensions for sustainable development namely; societal equity and environmental integrity. Societal equity issues include; ethics, fair trade, security, health services, water protection and consumer protection.

Environmental integrity issues include; waste management, water/soil/air quality, energy efficiency and renewable resources, green house gas emissions and climate change, life cycle analysis and green labeling and environmental management.

In order to ensure that the RSP was designed to promote EAC sustainable development, an analysis of non-economic issues was undertaken in this plan. These are mainly non-economic media issues (print and social media) that are of public concern.

Analysis of public concerns bring us a number of non-economic issues important for standardization. The results are summarized in Table 3, which provides non-economic priority sectors and fields of activities covered within the plan. The following ranking criterion based on ISO Manual for developing National Standardization Strategies was used:

Rank 1	Very serious and urgent problem, public outcry;
Rank 2	Serious problem, common occurrence, media attention;
Rank 3	Serious problem, some media reports;
Rank 4	Problem localized, no media reaction; and
Rank 5	Other issues.

2.3 EAC regional policy priorities

Further to the non-economic factors, it was important to analyze the EAC plans for development that greatly impact on some specific sectors.

Priority sectors in Table 4 were based on the 5th EAC Development Strategy for 2016-2021, EAC Industrialization Strategy 2012–2032, EAC Vision 2050, and policy directives among other documents.

The economic sectors expected to have greater importance according to development plans are summarized in Table 4. The following ranking criterion based on ISO Manual for Developing National Standardization Strategies was used:

- | | |
|--------|--|
| Rank 1 | Great importance expected in near future; |
| Rank 2 | Greater importance, if certain conditions are fulfilled; |
| Rank 3 | Some importance expected in medium term; |
| Rank 4 | Some importance expected in long-term; and |
| Rank 5 | No increase in importance expected. |

2.4 Stakeholders engagement

During the formulation of this plan, stakeholders were engaged through surveys, meetings, workshops and electronic platforms. The feedback from stakeholders was used for ranking and the results are summarized in Table 5 under column (f).

3 Selected sectors of Standardization

Based on the average ranking for the four socio-economic indicators namely GDP contribution, EAC export contribution/earnings, non-economic factors and regional development plans, an average general sector priority ranking was calculated for each economic sector, sub-sector and stakeholder ranking as indicated in Table 5.

Table 5 — Summary of EAC priority sectors for standardization

4 Identified projects per sector

The identified standards to be developed are classified in different categories, which include the endorsement of international standard (End), actively participate in the development of international standard (Ac), monitoring of international standard being developed (MO) , revision of existing EAC standard (Rev) and development of new EAC standard (DRS). The total identified projects for three years is 1066 standards; 341 standards in the first year, 376 standards in second year and 349 standards in the third year as provided in table 7. The details as a list of standards is provided in Annex A.

5 Required Resources for the Implementation of the RSP

The implementation of the RSP is made for three years and will be annually reviewed in order to capture incoming issues. The funding model is on the assumption that the hosting country for TC meetings will bear the cost of conference packages of about five participants per partner state. The cost of delegates of about three per partner state (chairperson of a TC, secretary of the TC and One member) will be sponsored by the respective partner state. However, this will not hinder additional participation at additional cost.

5.1 Financial Resources

The Financial resources required for implementation of RSP under three year period were calculated based on the identified Technical Committees and include financial resources for hosting EASC/TC(s) meeting(s) as referred in Table 9 and the cost of participating in those meeting (s) for the remaining partner states as referred in table 10. The details of each year are given in annex B and annex C, respectively.

- (1) The number of the TCs was calculated by considering by the number of DRS(s) and Rev(s) where 5 DRS(s) require 1 TC and 10 Revs require 1 TC. One TC require first technical committee meeting of 5 days at Committee draft stage, one technical committee meeting of 2 days after public review and 1 editing meeting of 3 days

5.2 Human Resources

For the implementation of this standardization plan, each partner states will be required to avail standards officer(s) as secretary of EASC/TC(s) at national level and overall regional secretary for the EASC/TC(s) for which the partner state host the secretariat. The human resources have been calculated by distinguishing the national secretariat and the overall secretariat as indicated in table 10 and the details are given in annexes D. The overall secretariat distribution is provided in annex E.

Note: *Number of Technical Committees held by Partner States as regional secretariat

Assumptions:

For the calculation of the required officers, average man-days available to TC secretary/editor per annum equals to 220

TC secretary requires 41 man-days to finalize a new EAC draft standard as TC secretariat

TC secretary requires 13 man days to participate in finalizing a new draft and to revise an existing EAC standard and

An editor requires 2 man days to edit a new draft or an existing EAC standard
